As part of the **Eastern Corridor** program, the SR 32/Bach Buxton interchange project will create a new, full-service diamond interchange along SR 32, immediately east of the existing Elick Lane intersection in the Eastgate area of Clermont County.

Construction includes realigning and extending Bach Buxton Road to connect to Old SR 74 on the north side of SR 32, as well as building a third, westbound lane on SR 32, between the new interchange and Glen Este-Withamsville Road, and realigning Bach Buxton Road between Marian Drive and Clepper Lane to the south of SR 32. As a result of the project, at-grade intersections and three traffic signals within the project zone will be eliminated.

Construction began in February 2022, and the project is scheduled to be complete in late fall 2024.

During the first phase of construction, traffic will be maintained on SR 32, and the Elick Lane intersection will remain open; however, the following changes will be implemented:

- Closure of Newberry Drive at SR 32 (along the eastbound side, at the former Thornton’s gas station) – March 2022
- Closure of Fayard Drive intersection along eastbound SR 32 – March 2022
- Closure of the south leg of Old SR 74 at SR 32 (eastbound side) – April 2022

These are permanent closures; traffic will be redirected via Elick Lane, Bach Buxton Road and Shayler Road during construction.

Other changes to be implemented later in the project include:

- Closure of the Elick Lane intersection & creation of a cul-de-sac.
- Closure of the north leg of the Old SR 74 intersection & creation of a cul-de-sac.
- Closure of the Fayard Drive intersection along westbound SR 32 & creation of a cul-de-sac.

As the schedule to close these intersections within the corridor has yet to be determined, access will continue to be maintained.
